

Letter of Agreement between Colorado Springs TRACON and Denver Center

Inbound to KCOS

- *Arrival Gates*
 - HUGO - From the BRK054R clockwise to the BRK097R, as depicted on the sector file
 - PUEBLO - BRK168R as depicted
 - BROADMOOR - BRK213R, only when COS is landing south
 - ACADEMY - BRK273R Props ONLY, 17,000 and below.
 - Also used as a departure gate

Altitude Assignments

GATE	JETS	PROPS
HUGO	13,000 – 16,000 (non RNAV) descend via OZZZY STAR (RNAV)	10,000
PUEBLO	14,000	13,000 (pointout to PUB)
BROADMOOR	16,000	16,000
ACADEMY	N/A	14,000

- *Notes*
 - Jets via HGO and PUB gates must be level at an approved altitude and sequenced in trail with other jets through the same gate. Jet arrivals on the OZZZY RNAV STAR must be assigned "descend via" unless otherwise coordinated or unless "descend via" will conflict with non RNAV aircraft on similar route.
 - HGO gate arrivals are expected to be cleared direct BRK anywhere between the BRK065R (GLD BRK) or the BRK086R (HGO BRK) or established on those two radials. RNAV equipped jets landing COS must be on OZZZY RNAV STAR.
 - Props via HGO and PUB shall be level below jets, in trail with other props
 - When PUB approach is not staffed (thus, ZDV owns the airspace), COS ATCT has control for lower on contact for all COS arrivals
 - Arrivals via the Broadmoor and Academy gates need not be coordinated as wrong altitude for direction
 - Props 10,000 and below may be cleared direct destination airport
